

*Next half term we will be exploring materials in our world.*

*We will be thinking about materials that keep us warm and dry, materials that are strong and weak and materials that are smooth or rough.*

*For the children's holiday project, we would like them to make a boat. They will need to think carefully about how they can make their boat waterproof and if they can make it float. The children can use junk box materials.*

*We will test the boats in our outdoor learning area in January!*

*Please bring your boat into school on Tuesday 9th January 2018.*
