

## Year 1 to Year 2 Holiday Project Summer Term 2021

### What is in your habitat?

In Year 2 you will be learning about animals and their habitats.

Your holiday project is to make a model of a habitat based on an animal of your choice. You will need to find out where your animal lives and what the habitat looks like. You may want to include other animals that live there.

You could use recyclable materials from around your house, including cardboard boxes, tins or jars.

Here are two examples.

Please return your holiday project on Monday 6<sup>th</sup> September 2021
