

## Year 3 Holiday Project

December 2019

In science next half-term, we will be learning about **forces and magnets**. Forces are pushes and pulls. These pushes and pulls usually change the movement of an object. They could make an object start to move, go faster, stop moving or go slower.

Your holiday project is to create an object that shows a push or pull movement. Have a look in your recycling bin for materials that you could use! Be imaginative and scientific.

### May the force be with you!

Please return your holiday project to your teacher on Monday 6<sup>th</sup>  
January 2020.
