

Design and Technology – Year 2

Spring 2 – Design, make and evaluate a felt flower brooch

In Design & Technology I have already learnt:

I made my own templates, measuring, marking and cutting out.

To thread a needle .

To add finishing touches to make my product appealing to the user.

Design, make, evaluate, user, purpose, ideas, design criteria, product, function, join, thread, needle, finish.

I can join materials using running stitch.

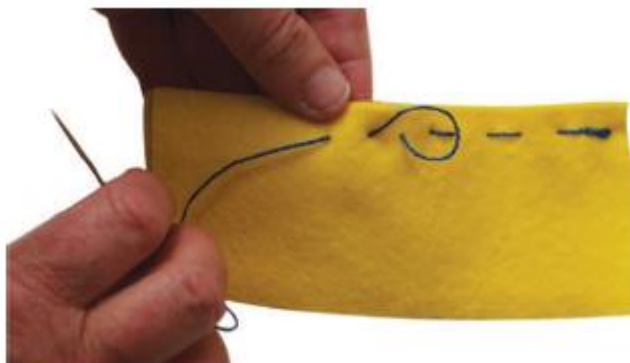

I am strengthening my knowledge of joining materials using glue, stapling and pinning and can **evaluate the advantages and disadvantages of each method.**

I am extending my knowledge of finishing a product through use of textile paints, glitter, fabric crayons and sequins.

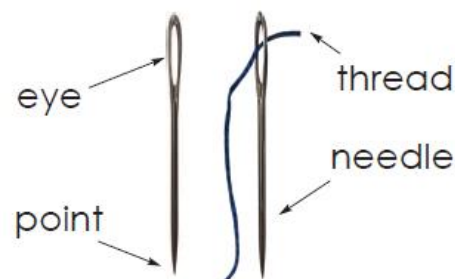

I can use a template or pattern and cut out the fabric piece for my product.

New Design & Technology words:

Template, pattern pieces, **mark out**, **mock up**, join, decorate, **sew**, **running stitch**, felt, finishing – textile paints – glitter and raised, sequins, fabric, fabric crayons

A simple running stitch

A labelled diagram of parts of a needle
