

Geography – Year 5

Autumn 2 – The Jewel in Birmingham’s crown.

In geography I have already learnt:

- To name and locate Birmingham on a map of the UK.
- To draw and label a sketch map using my own key
- To follow a simple map to show our route for our fieldwork trip.
- To use directional and comparative language when describing position.
- To understand that a photo or video is a record of what has been seen or heard.
- To identify different transport links in Birmingham and explain how they have changed over time.
- To describe the recent changes of land use within Birmingham.
- To use 4 figure grid references to identify features on UK OS maps.

location, function, inner city, urban, developed, suburb, transport systems, airport, train, tram, bus, taxi, cycle routes, canal, grid references, evidence, compare, contrast, landmarks, features, scale, motorway, city, town, hall, plan, locate, sketch map

Human and Physical Knowledge

I can distinguish between different types of industry and services – Jewellery making (secondary industry & service industry)

I can identify features of inner-city housing types.

I can recognise the changes in land use and transport links over time within the Jewellery Quarter and describe them.

Fieldwork skills

I can gather information about different buildings and economic activity in Birmingham and assess the quality of my evidence and suggest improvements.

I can use aerial photographs and make comparisons between different maps.

I can evaluate the usefulness of photographic evidence.

I can select a map for a specific purpose (OS maps, thematic maps, political maps, topographic maps)

New geography words:

Secondary industry, tertiary industry, service industry, manufacturing, land use change, green spaces

Jewellery, Jewellery Quarter, Royal Mint, Assay office, hallmark, St Paul’s Church, **housing**, loft conversion, **apartments**, vacant, derelict
