

Year 1 Holiday Project

October 2022

When we return to school, our science topic is Seasons. Look through your window and describe what you notice is changing.

What colour are the leaves on the trees?

Were they always this colour?

What is the weather like?

What clothes are you wearing?

What animals can you see?

How is autumn different to summer?

What are the similarities and differences between autumn and summer?

Draw a picture of what you can see and label this. You could go on an autumn hunt outside and bring in a sign of autumn to show your class too!

Please return your holiday project to your teacher on Monday 31st October 2022.
