

Year 3

Holiday Project May 2021

Help the Bees

Next term in science we are studying flowering plants.

We would like you to find out about bees.

You can:

Find out about different types of bees – make a guide to help people to identify different types of bees.

Find out which plants are best for bees and create a guide for gardeners so they plant the right plants to encourage bees to their garden.

Make a bee house for your garden – write the instructions and take a photograph to share with your class.

Take a photograph of your work or record your work on J2e5 and save it to your my files folder.

Please return to school on Monday 7th June 2021
