

Year 4 Holiday Project May 2021

Next term we will be learning about electricity in science. Over the holiday we would like you to keep a diary of the electricity you use in one day. This could be using an alarm clock when you wake up, using a phone to call someone or boiling the kettle for a cup of tea. Write down every time you use some electricity.

Think of a fun and creative way to present your electricity diary. This could be a poster, a leaflet, a journal or a graph.

We look forward to seeing your holiday projects!

Please return your holiday project to your teacher on Monday 7th June 2021.
