

## Year 4 Holiday Project Spring 2021

Next term we will be studying climate zones in geography.

For your holiday project we would like you to record the weather each day for 7 days.

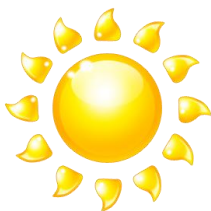

Record whether it has been sunny, rainy or cloudy and what the temperature was for that day. You may find it useful to watch the weather on the news or use the internet to look at weather reports.

Record your findings in the form of a poster, chart or on J2e5 with symbols for the different types of weather you experience.

Now you are going to be a weather forecaster.

Using the data, you have collected predict what you think the weather will be like for the next 7 days. Think about how you could present your predictions.

If you use the internet to research the weather, remember to do a safe search and tell an adult.

Please upload your work on to your J2efiles or email it to your class email address by  
Monday 19<sup>th</sup> April 2021
