

Grove School

Year 5 Holiday project February Half Term 2022

As part of our topic on the heart, we would like you to find out as much as you can about this fabulous pumping machine.

You need to research all about the heart and circulatory system. You could create a web page using J2e5 on BGFL, a poster, a booklet, an annotated drawing or a model of the heart.

You can use a variety of sources for your research and a variety of materials for your model including recyclable materials. You may even want to try and make a working, pumping heart.

Please complete your holiday project by 28th February and upload your work to BGFL or return it to your class teacher.
